main.c... Output

```cpp
#include <iostream>
using namespace std;
class Employee {
public:
    virtual void salary() = 0;
};

class FullTime : public Employee {
public:
    void salary() override {
        cout << "Full Time Salary: 30000" << endl;
    }
};

class PartTime : public Employee {
public:
    void salary() override {
        cout << "Part Time Salary: 5000" << endl;
    }
};

int main() {
    Employee *e;

    FullTime f;
    PartTime p;

    e = &f;
    e->salary();

    e = &p;
    e->salary();

    return 0;
}
```
